*Deadline for manuscript  
submissions:*

*30 November 2017*

#### Message from the Guest Editors

We are pleased to invite you to contribute to the Special Issue “Optofluidics: From Fundamental Research to Applications” organized by the MDPI journal *Micromachines*.

The aim of this Special Issue is to provide scientists working in the field with an up-to-date collection of papers investigating the world of micro-optofluidic devices. It will include both original research papers and short communications, together with invited review articles, covering the different aspects from basic research and components, up to technologically-mature integrated devices for biomedical applications.

Thanks to a close collaboration with the Optofluidics 2017 conference (<http://www.optofluidics.sg> 25–28 July, 2017, Singapore), providing an international and interdisciplinary forum for researchers, the Special Issue will also include relevant papers dealing with the conference topics.

Dr. Michinao Hashimoto

Dr. Paolo Minzioni

#### Author Benefits

**Open Access:** free for readers, with publishing fees paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Compendex (EI), Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 7 days (median values for papers published in this journal in 2016).
